Sharan 2011 2010 in practice managers of mergers and acquisitions m a draw their attention more and more to speed of integration within their m a strategies in a paradoxical manner m a research on speed of integration is still in its infancy and remains underdeveloped empirical findings reach from positive over negative to non significant relationships between speed and m a success carolin profit develops a research model which encompasses task integration speed and human integration speed as independent variables influencing the dependent variable of m a performance she clarifies the question of how the success factor speed can be used as a tool to enhance m a success based on the data collected from 101 german speaking companies she proves that task integration speed negatively influences m a performance while human integration speed promotes m a success the present study is unique as it quantitatively demonstrates that the two types of integration occur at different levels of speed therefore the m a success significantly depends on the chronology of the two types of integration

Theorizing Indian Foreign Policy 2017-04-21 following the end of the cold war, the economic reforms in the early 1990s and ensuing impressive growth rates, India has emerged as a leading voice in global affairs, particularly on international economic issues. Its domestic market is fast growing and India is becoming increasingly important to global geo-strategic calculations at a time when it has been outperforming many other growing economies and is the only Asian country with the heft to counterbalance China. Indeed, so much is India defined internationally by its economic performance and challenges that other dimensions of its internal situation, notably relevant to security and of its foreign policy, have been relatively neglected in the existing literature. This handbook presents an innovative, high-profile volume providing an authoritative and accessible examination and critique of Indian foreign policy. The handbook brings together essays from a global team of leading experts in the field to provide a comprehensive study of the various dimensions of Indian foreign policy.

The Oxford Handbook of Indian Foreign Policy 2015 small-scale traders play a crucial role in forging Asian connectivity, forming networks and informal institutions separate from those driven by nation-states such as China's Belt and Road Initiative. This ambitious study provides a unique insight into the lives of the mobile traders from Afghanistan who traverse Eurasia, reflecting on over a decade of intensive ethnographic fieldwork. Magnus Marsden introduces readers to a dynamic yet historically durable universe of commercial and cultural connections through an exploration of the traders' networks, cultural and religious identities as well as the nodes in which they operate. Marsden emphasises their ability to navigate Eurasia's geopolitical tensions and to forge transregional routes that channel significant flows of people, resources and ideas beyond the Silk Roads. Will interest those seeking to understand contemporary iterations of the Silk Road within the context of geopolitics in the region. This title is also available as open access.
