almost unique among the works of muslim scholars this book which for malikis is the risalah was written for children when the author was 17 years old the sheer pedagogical audacity of introducing children to what is in effect a complete overview of life and human society escapes most people and most muslims today the author commences with usul ad deen the roots of the deen a survey of the vital muslim worldview proceeding then through purification and the acts of ibadah the ordinary transactions such as marriage divorce buying and selling and so forth and concluding with chapters of a general and miscellaneous nature the book is here matched by the outstanding lucidity of the translation which reveals a book written in a narrative descriptive style rather than in a didactic scholarly tone making it breathtakingly accessible so significant was the book s authorship and so quickly was it recognised that its author became known as the young malik and his work became a foundational pillar of the madhhab of the school of madinah and has endured for a millennium in use both to teach absolute beginners as intended and as a resource for scholars this edition presents the translation in parallel with the arabic text without vowellisation tashkeel ibn abi zayd al qayrawani 310 ah 922 ce 386 ah 996 ce was born in qayrawan in tunisia arguably one of the most important muslim cities after makkah and madinah which was always famous for learning and in particular for its staunch adherence to the school of the people of madinah as transmitted by imam malik his life was overshadowed by the fatimid dynasty during which he and the other teachers of qayrawan calmly kept alive the teaching of the book of allah and the sunnah among his other well known works are the massive multi volume an nawadir wa z ziyadat and a mukhtasar abridgement of the mudawwanah of which only the kitab al jami a comprehensive work containing a wide variety of topics is extant aisha bewley is the translator of a large number of classical works of islam and sufism often in collaboration with abdalhaqq bewley notably the noble qur an a new rendering of its meanings in english muhammad messenger of allah the translation of qadi iyad s ash shifa the muwatta of imam malik ibn anas and imam an nawawi s riyad as salihin

this volume explores the ways in which ethnography can create a greater understanding of islam in particular social contexts it does so by advancing a pluralistic use of ethnography in research about islam in anthropology and the other social science disciplines the contributors have used ethnography to engage with and relate to specific empirical realities in regions around the world they argue that this approach allows for a more precise and complex understanding of the practices and discourses that constitute social realities constructed and perceived as islamic by those who live them furthermore the book encourages ethnography in the study of muslim practices that have seldom been approached in this way
