the official statutes and ordinances of the university of cambridge

## Foundations Of Library And Information Science [Vol.1] Paper 1 Of Ugc Model Curriculum

1981

social computing is concerned with the study of social behavior and social context based on computational systems behavioral modeling provides a representation of the social behavior and allows for experimenting scenario planning and deep und standing of behavior patterns and potential outcomes the pervasive use of computer and internet technologies by humans in everyday life provides an unprecedented en ronment of various social activities that due to the platforms under which they take place generate large amounts of stored data as a by product often in systematically organized form social computing facilitates behavioral modeling in model building

analysis pattern mining and prediction numerous interdisciplinary and interdependent systems are created and used to represent the various social and physical systems for investigating the interactions between groups communities or nation states this requires joint efforts to take advantage of the state of the art research from multiple disciplines improving social computing and behavioral modeling in order to document lessons learned and develop novel theories experiments and methodologies to better explain the interaction between social both informal and institutionalized psychological and physical mechanisms the goal is to enable us to experiment create and recreate an operational environment with a better understanding of the contributions from each individual discipline forging joint interdisciplinary efforts this volume comprises the proceedings of the third international workshop on social computing behavioral modeling and prediction which has grown tremendously
