the code of federal regulations title 26 contains the codified federal laws and regulations that are in effect as of the date of the publication pertaining to federal taxes and the internal revenue service

Title 26 Internal Revenue Part 1 (§ 1.1551 to end of part 1) (Revised as of April 1, 2014) *2014-04-01*

the rapid increase of cloud computing high performance computing hpc and the vast growth in internet and social media use

have aroused the interest in energy consumption and the carbon footprint of data centres data centres primarily contain electronic equipment used for data processing servers data storage storage equipment and communications network equipment collectively this equipment processes stores and transmits digital information and is known as information technology it equipment advanced concepts for renewable energy supply of data centres introduces a number of technical solutions for the supply of power and cooling energy into data centres with enhanced utilisation of renewable energy sources in order to achieve low energy data centres because of the high energy density nature of these unique infrastructures it is essential to implement energy efficiency measures and reduce consumption before introducing any renewable energy source a holistic approach is used with the objective of integrating many technical solutions such as management of the it information technology load efficient electrical supply to the it systems low ex air conditioning systems interaction with district heating and cooling networks re use of heat free cooling air seawater groundwater optimal use of heat and cold storage electrical storage and integration in smart grids this book is therefore a catalogue of advanced technical concepts that could be integrated into data centres portfolio in order to increase the overall efficiency and the share of renewable energies in power and cooling supply based on dynamic energy models implemented in trnsys some concepts are deeply evaluated through yearly simulations the results of the simulation are illustrated with sankey charts where the energy flows per year within the subsystems of each concept for a selected scenario are shown and graphs showing the results of parametric analysis a set of environmental metrics as the non renewable primary energy and financial metrics capex and opex as well of energy efficiency metrics like the well known pue are described and used to evaluate the different technical concepts

Advanced Concepts for Renewable Energy Supply of Data Centres *2022-09-01*

the code of federal regulations title 26 contains the codified federal laws and regulations that are in effect as of the date of the publication pertaining to federal taxes and the internal revenue service

this two volume set of lnai 13551 and 13552 constitutes the refereed proceedings of the 11th ccf conference on natural language processing and chinese computing nlpcc 2022 held in guilin china in september 2022 the 62 full papers 21 poster papers and 27 workshop papers presented were carefully reviewed and selected from 327 submissions they are organized in the following areas fundamentals of nlp machine translation and multilinguality machine learning for nlp information extraction and knowledge graph summarization and generation question answering dialogue systems social media and sentiment analysis nlp applications and text mining and multimodality and explainability

General Studies (Part - 1) for NDA/NA Entrance Exam *2018-11-08*

language has long been considered independent from emotions in the last few years however research has accumulated empirical evidence against this theoretical belief of a purely cognitive based foundation of language in particular through research on emotional word processing it has been shown that processing of emotional words activates emotional brain structures elicits emotional facial expressions and modulates action tendencies of approach and avoidance probably in a similar manner as processing of non verbal emotional stimuli does in addition it has been shown that emotional content is already processed in the visual cortex in a facilitated manner which suggests that processing of emotional language content is able to circumvent in depth semantic analysis yet this is only one side of the coin very recent research putting words into context suggests that language may also construe emotions and that by studying word processing one can provide a window to one s own feelings all in all the empirical observations support the thesis of a close relationship between language and emotions at the level of word meaning as a specific evolutionary achievement of the human species as such this relationship seems to be different from the one between emotions and speech where emotional meaning is conveyed by nonverbal features of the voice but what does this relationship between written words and emotions theoretically imply for the processing of emotional information the present research topic and its related articles aim to provide answers to this question this book comprises several experimental studies investigating the brain structures and the time course of emotional word processing included are studies examining the affective core dimensions underlying affective word processing and studies that show how these basic affective dimensions influence word processing in general as well as the interaction between words feelings and expressive behavior in addition new impetus comes from studies that on the one hand investigate how task sublexical and intrapersonal factors influence emotional word processing and on the other hand extend emotional word processing to the domains of social context and self related processing finally future perspectives are outlined including research on emotion and language acquisition culture and multilingualism in summary this textbook offers scientists from different disciplines insight into the neurophysiological behavioral and subjective mechanisms underlying emotion and language interactions it gives new impulses to existing theories on the embodiment of language and emotion and provides new ways of looking at emotion cognition interactions
